Tues., Sept. 29: **Moving Water Canoe Clinic.**
Watershed Awareness Clinic.

UCSF
University of California San Francisco

TO OUR NEIGHBORS

September & October, 1981, Vol. VI, No. 4

Neighborhood Invited to Picnic Oct 17

The neighborhood is invited to attend UCSF's First Annual Picnic on Saturday, October 17. It will be held in Golden Gate Park, Speedway Meadows from 10 a.m. to 4 p.m. Everyone on campus is invited to attend, and bring families and friends.

One of the main events featured will be the "Chancellor's Cup Race," a five-kilometer or three-mile event for seasoned runners and for adventurous others. Those completing it will receive a free T-shirt. Winners will receive UCSF medallions and other prizes.

Games, including sack races, organized by the UCSF Child Care/Study Center, will be available for children under 12 years of age.

Softball and volleyball tournaments will be held, with prizes for the winning teams. The UCSF Marching Band, which made its debut on Chauncey Leake Day last June, will entertain. Folk dancing, an Exploratorium exhibit and checkers tournament tables also will be available.

Hot dogs, soft drinks and beer will be sold.

If you would like to volunteer to observe the race, work on a food table, or help with the children's games, contact Thena Trygstad at 666-2401.

Chinese and Afro-American Art

Every month the UCSF Hospitals Auxiliary sponsors an art exhibit in the lobby of Moffitt Hospital, 505 Parnassus Avenue.

Featured in September will be poetry and Chinese brush work by two UCSF employees. Their art is a universal art form that possesses the soft delicate beauty of Chinese brush painting and the deep emotional expressions of the Afro-American.

Also featured this month are batik, silkscreens and photographs.

For further information, or to purchase work, visit the Auxiliary Office, next to the Moffitt Hospital cashier's booth, or call 666-4906, between 10 a.m. and 2 p.m.

Poison Oak and Ivy Study

Volunteers are needed for a UCSF study to develop a vaccine for poison oak and poison ivy. Families in which both parents are sensitive to oak and ivy plants and who have two children, not yet sensitized, between the ages of 5 and 8 are needed.

The study will determine if children can be given injections of small amounts of urushiol in olive oil to induce a state of tolerance to urushiol, the chemical in poison oak and poison ivy plants that produces the skin reaction.

Parents who meet the stated qualifications, who would like to have their children volunteer, and who plan to remain in the Bay Area for the next five years, should call 666-2545.

Controlling TB in Peru

National and international public health organizations are joining the Peruvian Ministry of Health in a mutual assistance program to control tuberculosis in that country thanks in large part to the efforts of pulmonary researcher Jay Nadel.

The project is designed to train Peruvian health professionals to combat the leading cause of death in that country. Authorities estimate that Peru's TB rate is at least 10 times that of the U.S.

As a result of Nadel's efforts, and those of a steering committee which he chairs, the project, which will cost $100,000 a year, is being coordinated by the International Union Against TB (IUAT) and is sponsored by the World Health Organization, the Pan American Health Organization, and the American Lung Association.

Work for Retirees

UCSF's Retirees' Employment Program provides jobs at a regular university salary for retired persons.

This program is the first of its kind in the nine-campus university system and now involves more than 70 retirees and a total of 23 UCSF departments including the Eye Clinic, Pediatrics, Orthopaedic Surgery and Cancer Research.

If you are retired and would like to share your expertise with other campus employees, please contact Faracita Wyatt, coordinator of the program, at 666-2715, Tuesdays and Wednesdays, 10 a.m. to 4 p.m.; Thursdays, 1 to 4 p.m.; or leave a message in the Personnel Office at 666-1645.

New Alarm System

To provide further personal safety while visiting the campus, a new emergency alarm system has been installed on each floor of the parking garages of Millberry Union and the Ambulatory Care Center.

The system is located on specially painted yellow columns and at each elevator foyer. Each alarm is marked with a large red and white sign.

To operate, the caller must push the button and a police dispatcher will answer. The caller then can describe the nature of the emergency. Police officers will be dispatched to the location simultaneously.

Installation of the new alarm system is in response to a recommendation made by the Chancellor's Emergency Task Force on Personal Safety. For further information contact the UCSF Police Department at 666-1414.

Millberry Union Cards Available

A limited number of Millberry Union membership cards are available to the neighborhood for a fee of $45. This new fee eliminates the $1 per visit charge. They are good for a three-month period and enable cardholders to use most of the athletic facilities, including the swimming pool, saunas, weight and exercise rooms and gymnasium.

Cardholders also receive discounts to recreational classes, films and other events sponsored by the Committee for Arts and Lectures, and have access to the game area with ping pong, pool, TV lounge and music practice rooms.

Cards for the Fall Quarter go on sale Saturday, September 26 at noon, on a first-come-first-served basis. Individuals wishing to purchase a card must live within the boundaries of Kirkham, Ninth Avenue, Lincoln Way and Clayton.

Two pieces of ID are required at the time of purchase: a photo ID and a proof of residence. For further information call 666-2019; after 5 p.m. 666-2571.

Poison Center To Remain Open

Closing of the Bay Area Regional Poison Control Center at SFGH for lack of funding was averted by a last minute pledge of financial support from S.F. Public Health Director Mervyn Silverman.

Jere Goyan, dean of the UCSF School of Pharmacy, had announced that the facility had exhausted every conceivable source of funding, right down to the sale of T-shirts by students and staff.

Goyan said that UCSF was mandated to fund only the center's teaching programs, but had subsidized about 45 percent of the total services — a quarter of a million dollars since the center opened.

Established in February 1979 by the UCSF schools of Pharmacy and Medicine, in cooperation with the S.F. Department of Public Health, the center is staffed around the clock by UCSF pharmacists and takes about 25,000 calls a year on its telephone hotline, based at the SFGH Emergency Room. The Poison Center staff was involved in both the South San Francisco and PG & E toxic accidents last month and received 400 calls in one day on the Financial District PCB problem.

The Center provides poison information, treatment and referral assistance to approximately four-and-a-half million Northern Californians living in San Francisco, Marin, San Mateo, Alameda, Contra Costa, Mendocino, Del Norte, Humboldt, Lake, Napa and Solano counties.

Programs for Parents and Teens

• Overweight teens, ages 15 to 19, are encouraged to register now in "Shapedown," a program designed to help teenagers develop new exercise and eating habits.

Sponsored by the UCSF Adolescent Medicine Unit, the classes will meet from 4 to 5:30 p.m. beginning Wednesday, September 23, and continue for the next 12 weeks.

The emphasis is on helping participants alter their weight by taking charge of their own behavior and learning to deal effectively with common teenage habits like night binges and constant dieting. For further information contact Lesley Yu at 666-2184.

• A four-part workshop to help parents ease the transition from childhood to the teenage years will be held on Wednesdays, October 14, 21, 28 and November 4, from 4:30 to 6 p.m. at the UCSF Youth Clinic, 400 Parnassus Avenue. The enrollment fee is $25 per person or $35 per couple. The workshop is open to parents of teens 11 to 13 years of age.

Workshop discussion will focus on bodily changes in early adolescence, sexuality, intellectual and emotional development, changes in relation to the family and normal problems during these years. Advance registration is required. Interested parents should call 666-2184 for further information.
